Torre de la Sal is located in the seaside town of Torre la Sal, near the Prat de Cabanes-Torreblanca Natural Park.

The Salt Tower is a defensive construction of the coast Castellón, built between the 14th and 15th centuries. Next to this, in the Ribera de Cabanes (Castellón), there is a network of enclaves fortifications: the towers of the «Carmen» «dels Gats» and «Carmelet», the Church Albalat Fortress. These five monuments are a cultural and tourist attraction, signposted from Cabanes
